DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by JP A 10-190354 (cited by the applicant).

Regarding claims 1 and 6, the JP A 10-190354 reference discloses a semiconductor device (Fig. 1) showing dotted line indicating a crystal oscillator (Xtal) installed outside and an inverting amplifier (INV1, 9, 2, 3) installed inside. Fig. 1 shows a first terminal (T1), a second terminal (T2), a transmission gate (2 and 3), an inverter (INV1), a clamping circuit (9) having a first electrode (drain, ND1), a second electrode (source, 10) and a third electrode (gate) directly connected to a transistor (3) of the transmission gate (2 and 3). It is noted that functional limitation recited in the claim inherently present in the structure because the structure is same as the one in this instant application. It is also noted that a CMOS transistor has an insulated gate.

Regarding claim 2, Fig. 1 shows CMOS transmission gate (2 and 3).

Regarding claim 3, Fig. 1 shows a buffer (INV2 and INV3).

Regarding claims 4 and 7, Fig. 1 shows a transmission gate (4 and 5) that is disposed between the inverting amplifier (INV1, 9, 2, 3) and the buffer (INV2).

Regarding claim 5, Fig. 2 shows a feedback resistor (R).
